

Micro Controlled SOLENOID BATTERY ISOLATOR

Features:

- Designed to maintain the main battery voltage in dual battery systems
- Minimal voltage drop
- Spike protected
- Delayed start
- Simple Installation - with 2 mounting points
- Suited to all vehicles, boats, caravans and mobile homes
- Override (optional requires momentary switch)

Specifications	SBI-100A-12
Electrical System Type	12V Neg. Earth
Charging System Suitable For	100 Amps
In Rush Current	400 Amps
Current In Voltage	13.5 VDC
Current Out Voltage	12.5 VDC
Output Connection - Brass Studs	Main and Aux. Batteries
Dimensions L x W x H mm	84x77x67
Weight	230gms
